Fire Protection, Session T10

Fire Protection Improvement Plan

John Hannon

**Branch Chief – Plant Systems
Division of Systems Safety and Analysis
Office of Nuclear Reactor Regulation
United States Nuclear Regulatory Commission**

April 17, 2003

Fire Protection Improvement Plan

- NRR is providing increased management attention to address both emerging and longstanding fire protection issues.
 - Establish timely closure plans
 - Work with stakeholders to produce safe and realistic solutions
- NRR welcomes input from all interested stakeholders on how to resolve fire protection issues.
- Risk-informed methods and techniques will be prudently employed to provide reasonable assurance of safety when developing solutions to fire protection issues.

Fire Protection Improvement Plan

- Proposed Circuit Analysis Inspection and Resolution
 - Inspection plan to support the withdrawal of the circuit analysis EGM (Enforcement Guidance Memorandum)
 - Risk-Informed input
 - Stakeholder input
 - Inspection Guidance
